SLO's Tacos Acapulco must drop the last half of its name due to a conflict with Long Beach based Acapulco Restaurant Inc.

## Tacos Acapulco forced to drop last half of name

By Glenn Policare  
Staff Writer

The name may be changing, but the mariachis will still play on.

Due to a conflict of interest concerning name infringement, Tacos Acapulco is being forced to drop the last half of its name. It will now be known as Tacos.

Acapulco Restaurant Inc., a Long Beach-based corporation, has owned the name Acapulco since 1960. Dan Charleton, vice president of marketing for the corporation, says that the main issue is that a company needs to protect its name.

"If they (Tacos) are allowed to use the name, then other businesses can use this case as precedence," Charleton said.

Acapulco Restaurant Inc. plans on expanding to the Central Coast in the next two to three years, Charleton said. "We have nothing against the independent individual businessman," Charleton said. "But if you have good food, you can call it anything."

As of Feb. 1, the word Acapulco cannot be used in any way, shape or form associated with the local restaurant. Tacos would be found in contempt of court if they failed to comply, Charleton said. This explains the cardboard, masking tape and black marker sign cover-ups at all five area locations.

Despite the temporary, construction-site look, business is still booming.

Olga Sanderson, Tacos

**"If they (Tacos) are allowed to use the name...other businesses can use this case as precedence."**

Dan Charleton,  
Acapulco Restaurant

manager, said the name change may actually be better for business. Tacos will soon be conducting a contest allowing patrons to rename the restaurant.

"It's a chance for the people of San Luis Obispo to be a part of the restaurant," Sanderson said.

## Congress considers new student loan legislation

By Katherine Gill  
Staff Writer

The House Education and Labor Committee held a hearing last Thursday on the Income-Dependent Education Assistance Act, a new student loan bill that supporters are confident will be approved.

"All in all, the meeting went quite well," said George Conant, legislative assistant to U.S. Rep. Tom Petri, R-Wis., author of the program. "We're feeling very optimistic at this point."

The Petri bill, which has companion legislation proposed in the Senate by Dave Durenberger, R-Minn., would make available up to \$70,000 for most college- and graduate-level students, and up to \$143,000 for medical students.

If the committee approves the bill, the IDEA Act could be added as an amendment to the reauthorization of the Higher Education Act later this year.

"If it's approved, we could have the program running by 1993-94," Conant said.

Diane Ryan, Cal Poly director of Financial Aid, said it would be premature to get excited about Petri's bill being approved.

"It is just one of a plethora of pieces of legislation floating around Congress right now," Ryan said.

Ryan said the Higher Education Act expired last October. Many such loan programs will be proposed before the original act is

**"There is a pressing need to find out how, why, when and at what cost to make student loans available."**

Diane Ryan,  
Financial Aid director

reauthorized, she said.

There is also the possibility, Ryan said, that when the Higher Education Act is reauthorized it only will be changed slightly or kept the same.

In a time that is confusing for middle-class America, the bill's intention is well-placed, Ryan said.

Ryan said she would welcome a return to something sane for middle-income families who have the most difficulty in securing loans.

"There is a pressing need to find out how, why, when and at what cost to make student loans available," Ryan said.

Conant said, "Almost every student, regardless of parents' income, would be able to take out loans."

Under the income-dependent approach, students would repay their loans based on their incomes after leaving school.

Former students making more money would pay back

## \$20,000 grant finances study of no-smoking ordinance effects

By Dan Shargel  
Staff Writer

San Luis Obispo's no-smoking ordinance has not financially afflicted the city's bars and restaurants, says an administration analyst for the City of San Luis Obispo. A \$20,000 grant will fund a study to confirm that.

Debra Hossli, administration analyst, said Thursday that a grant from the California Healthy Cities Project will fund the study to be conducted by Cal Poly's School of Business.

The study will "formalize" the city's consensus that the ordinance has had little impact on the business community, Hossli

said.

"The city feels, on a kind of intrinsic level, that (the financial impact) hasn't been that dramatic," Hossli said. "Our Chamber (of Commerce) doesn't think it's a big deal."

An analysis confirming the ordinance's limited financial impact would hopefully encourage other cities to adopt a no-smoking ordinance, said Councilmember Peg Pinard after the council unanimously approved the grant at their last meeting.

"It would eliminate a lot of fear by the other agencies or communities who aren't really sure they want to do it because they think (businesses) will go

belly-up," Pinard said.

Hossli said the study's results would be available to the many communities who call the city asking about the ordinance's financial effects.

The study could begin as early as the end of this month.

Results are expected by late August.

Hossli said she will meet with Dave Garth, the executive director of the San Luis Obispo Chamber of Commerce, and William Boyes, dean of the School of Business, today to work out the details.

The California Healthy Cities Project is funded by the cigarette tax, she said.

SHERRY L. GURTLER/Mustang Daily

San Luis Obispo's no-smoking ordinance has not injured the city's bars and restaurants financially, city officials say. A state grant will be put to work, along with the School of Business, to confirm this.

### Basque group takes credit for car bombing

MADRID, Spain (AP) — The Basque separatist group ETA claimed responsibility Sunday for the deaths of five people in a Madrid car bombing and pledged to continue its attacks.

The attack Thursday was the bloodiest of the year and left Spaniards jittery in the face of ETA threats to target the Summer Olympics in Barcelona, Expo '92 in Seville and events during Madrid's one-year designation as Europe's cultural capital.

ETA, an acronym for Basque Homeland and Liberty, has claimed responsibility for nearly 700 deaths since 1968, when it began its armed campaign for the independence of the three-province, northern Basque region. The statement claiming responsibility for Thursday's attack was published in the Basque newspaper Egin.

### Opposition candidate wins Japanese election

TOKYO (AP) — An opposition candidate running on an anti-corruption platform won an easy victory in a special parliamentary election Sunday, delivering a setback to Prime Minister Kiichi Miyazawa's 3-month-old administration.

Analysts said the loss could jeopardize parliamentary debate on next year's budget and influence the future of Miyazawa's government.

The vote was the first for a parliamentary seat since Miyazawa took his post in November and was seen as an indicator of public sentiment about the governing Liberal Democrats going into elections for the upper house in July.

Yukihisa Yoshida, backed by the powerful Rengo labor federation and Socialist and Democratic Socialist parties, won 244,930 votes, compared to 178,002 for the governing party candidate, Nobuharu Enoki. Mitsuko Imai of the Japan Communist Party got 55,927 votes.

## NATION

### Tobacco growers get help from government

WASHINGTON (AP) — The Agriculture Department is giving tobacco farmers \$3.5 million this year to promote their product overseas as smoking becomes increasingly unpopular in the United States.

Tobacco Associates, a group of Southeastern tobacco growers, already has spent \$3.36 million in federal money helping government-owned cigarette monopolies abroad make a smoother, blended cigarette using American leaf.

The grants are part of a \$200-million-a-year program to promote U.S. foods and farm products abroad. For the tobacco industry, export markets have become increasingly important as health-conscious Americans give up cigarettes.

"There is a significant smoking population in the world, and there's a growing demand for a high-quality American blend cigarette. We want them to contain as much American tobacco as possible," said Kirk Wayne, president of Tobacco Associates.

### Second consecutive Tomahawk test fails

EGLIN AIR FORCE BASE, Fla. (AP) — An unarmed Navy Tomahawk cruise missile destined for Eglin Air Force Base crashed 50 miles off-target in Alabama, the second consecutive Tomahawk test flight that has gone awry.

The missile was launched Saturday from the destroyer USS Arleigh Burke in the Gulf of Mexico. It landed about five miles east of Rome, Ala., and 50 miles north of its target at Eglin in the Florida Panhandle, the Navy said.

What went wrong in the 700-mile flight was not immediately determined, said Susan Boyd, a spokeswoman for the Navy's cruise missile project. The Tomahawk was one of the high-tech successes of the Persian Gulf War.

It was the fifth crash in 28 launches from the Gulf of Mexico since 1985. None of the crashes caused any injuries.

## STATE

### Offshore sewage leak forces quarantine

SAN DIEGO (AP) — Bacteria levels remain dangerously high along a 20-mile coastal stretch from Ocean Beach to the Mexico border where sewage has been gushing into the sea unabated for a week from a broken pipe.

Health officials quarantined all fish and marine life along the 20-mile area extending three miles offshore on Saturday. Waterborne diseases ranging from dysentery to typhoid and hepatitis were possible.

Coliform bacteria counts measured Saturday were up to 1,100 times the legal limit, said Ruth Covill, a spokeswoman for the county Department of Health Services.

The partially treated sewage began streaming into the ocean last Sunday at a daily rate of 180 million gallons. The pipe ruptured 3,150 feet from the Point Loma sewage treatment plant, which serves 1.7 million residents.

The rupture occurred in 35 feet of water. Normally, the outfall pipe carries effluent 2.2 miles offshore to a depth of 220 feet.

### Hospital fires employees connected with beatings

SAN JOSE, Calif. (AP) — Three psychiatric technicians, including a murder suspect, have been fired from a psychiatric hospital amid an investigation into patient injuries and mutilations, authorities said.

Investigators looking into the beating and stabbing death of 29-year-old Joseph "Jo Jo" Bacaylan at Agnews Developmental Center last month found that six other patients in the ward had broken ribs or fingers, said clinical director Charlotte Stewart.

The victims were in the ward for the hospital's most retarded and helpless patients.

Santa Clara police have arrested psychiatric technician Frank Vasquez and charged him with murdering Bacaylan and assaulting another patient. Two other employees have been fired for failing to report abuse and not getting help for the patients, Stewart said.

## WELLNESS WELLNESS WELLNESS

### Educator urges open discussion of sexual issues

By Staci Graham  
Special to the Daily

Wear a condom. Protect yourself from AIDS. Abstinence and therefore must be repeated over and over until people begin choosing healthier sexual behavior.

In light of the overwhelming number of cases of AIDS, STDs and unwanted pregnancies, it is obvious that something isn't working. The majority of people know the importance of using a condom, and that they should use one, and yet many people don't. Why?

As a sexuality peer health educator, I believe that one of the biggest reasons stems from lack of communication concerning sexuality. Many people know the facts, the risks, the statistics and yet most can't find the nerve to simply talk to their partner about their feelings on the subject.

A "typical" scenario goes like this.

CAN PUT YOU AT THE TOP OF YOUR CLASS, YOUR  
FIELD — AND YOUR POTENTIAL — IN COLLEGE . . .  
AND AFTER COLLEGE. WE'LL SHOW YOU HOW. . .**

**YOU COULD BE READING, STUDYING  
AND LEARNING UP TO 3-TO-4 TIMES  
FASTER — BEFORE FINALS!**

**FINALLY! MAKE TOP GRADES EASILY,  
IN 2/3 LESS STUDY TIME  
— WITH NO MORE CRAMMING . . .  
AND A LOT MORE FREE TIME!**

**AND YOU CAN DO IT TODAY — In Just Five Enjoyable, Easy Lessons.  
Like Our Typical Graduate, You'll Learn How to:**

- ☐ Read, study and learn up to 3-to-4 times faster — even in the most difficult material — while you concentrate better, comprehend more . . . and remember it longer!
- ☐ Make top grades easily — or dramatically boost your current grades . . . before finals!
- ☐ Make college and studying more fun by handling required work faster — with a lot more free time for yourself, for your friends . . . and for the things you want to do!
- ☐ Handle note-taking, exams, research papers — even math and science problems — far more efficiently.

- ☐ Cut technical reading and study time by 2/3, saving you 10-to-20 hours (or more) each week — and hundreds of hours a year . . . for a lifetime!
- ☐ Avoid the pressure and frustration of falling behind (or forgetting what you've learned) — while getting more done in just 1/3 the time — with less effort and no cramming!
- ☐ Gain a vital competitive edge in the race for better jobs, faster promotions and higher earnings after college!
- ☐ Keep abreast of the explosive growth in essential pleasure and technical reading both within — and outside — your field!

**POWERFUL TECHNIQUES That Are Simply Not Available From Any Other Program — And PERMANENT RESULTS You Can Feel! From The Very First Lesson . . . Plus a GUARANTEED LIFETIME MEMBERSHIP Already Enjoyed by Nearly ONE MILLION OTHERS NATIONWIDE! It All Starts This Week With A Free Lesson That Could Double Your Reading and Study Speed.**

These days, your entire future can depend on how well you do in college — and how well you keep up in your field after college. In fact, doing college right can tie up years of your life — including many hours of hard work each week — and thousands of dollars in tuition. But unless you really learn the material — and have the top grades to prove it — there's just no guarantee that you'll be able to compete successfully for the best jobs, earnings, promotions and opportunities after college.

And we've all been told that personal growth — and social time — are also a big part of what college and professional life are all about. But with so much to read, study and learn — and so little time to do it in — how do you handle everything you have to do . . . and still make time for any of the things you want to do? And how do you avoid the pressure and frustration of falling behind?

Learn how to do it all — because students and professionals just can't afford to fall behind! Nowadays, how well you do in life can be determined by how much you know — which depends largely on how fast (and how well)

you read, study and learn. And that's where Evelyn Wood Reading Dynamics® College Programs can give you a major competitive edge.

Evelyn Wood® works — with superior results that leave other reading programs far behind! As the world leader in rapid reading and study programs for over thirty years, we can help you to catch up, keep up . . . and get ahead! In fact, Evelyn Wood has already helped nearly one million successful students, educators, professionals, executives, senators — even several U.S. Presidents — to do just that!

Prove it to yourself with a free lesson that could double your reading and study speed in just 20 minutes. You'll also learn about proven, advanced reading and study techniques that could save you hundreds of hours in the next year alone . . . and about skills that can virtually unlock your potential for accomplishing more — with less effort and greater flexibility — for years to come!

So don't miss out. The phone call is free, the results are immediate . . . and the benefits will last you a lifetime. Call today!

**CALL TODAY AND TOMORROW FOR A FREE LESSON!

## COMMENTARY

### U.S. tax system needs restructuring

By Dax Jonas

The national debt is at \$5 trillion right now. The United States has become the world's largest debtor. The interest alone is enough to consume nearly 25 percent of the federal budget. Something needs to be done to remedy this situation which the government is still ignoring.

The Republicans are not to blame. Neither are the Democrats. It's all the pretty boys in Washington who take advantage of the public's lack of attention to their actions. The government is out of control.

People are having to think before they spend their money in this economic time. Some are having to find ways to make a little extra cash so they can make ends meet. Why should the government be any different from the people it is supposed to be representing?

A government agency filing for bankruptcy is something which should be an impossibility. The Richmond (Calif.) School District was forced to file for bankruptcy because it could not meet payroll. This is happening under an education President and the people don't seem to mind.

The government needs more money and it needs to spend the money it has with some thought.

President Bush has taken some token steps in the direction of cutting spending. In cutting some military programs, Bush has attempted to show that he is doing something. The defense budget is still too high,

considering this is peacetime and the U.S. has no real power opposed to it.

Cutting spending is not going to be enough. The government at the state and federal levels are unable to keep up with the demands put upon it. More money needs to be in the system.

Raising some taxes is one of the only solutions to a problem antagonized by years of poor administration. Tax increase is such a dirty phrase, but a balance of increase, decrease and elimination is what the country needs to get back on track.

Luxury, import, corporate and the upper-class taxes all need to be raised in order to make the national debt something that is comprehensible.

The upper class pays little tax — about 10 percent of its annual income goes toward taxes. The middle class, however, shells out 30 percent of its income. It's time to hit the wealthy for a little more. The country can no longer ride on the backs of the middle class. Maybe getting rid of some of the loopholes would help. A flat tax of 13 to 15 percent would be the biggest help.

Luxury items, such as fur coats (animal hides), luxury automobiles (gas guzzlers), 25-foot yachts (phallic symbols) are not necessities. If someone wants these kinds of toys and they can afford them, then there should be no problem with the extra cost taxes would bring.

The trade deficit is disgusting. Higher taxes on import items would force the cost of foreign goods to go up. Higher-priced goods would open up a market for domestic competition. There would be no hard feelings of course, after all, the nation's largest companies pay more in foreign taxes than they do in domestic.

That is another thing, corporations pay little tax at all. Companies such as Ford, Lockheed, AT&T and the eight largest banks in the country pay no federal tax at all.

It's about time we get a little of the corporate money away from those CEOs, who make as much as \$78.2 million in one year (Steven J. Ross of Time Warner). Their henchmen (board members) are as bad — they give themselves raises, usually in spite of the company's performance. ITT board members gave themselves \$40,000 dollars in extras in one year.

These men (there are very few women making this much money) decide their own pay. This type of self-enrichment, rivaled only by the members of the Senate and Congress, is inexcusable and revolting. We need to tax these crazies.

Increasing taxes on killer items, like cigarettes and alcohol, would help the government get on track. These increases, along with a elimination of some other taxes such as the gasoline tax (about 30 cents per gallon is tax) would help.

Until people care a little

about the big picture, which everyone fits into, the government has no reason to act. People need to care about their country and demand that it gets back on track.

The government is forced to act only if the people demand it. The government needs to cut spending, restructure the tax system and work for the people and not off the people.

Cuts in spending could open money for important programs in danger of going bankrupt.

A restructured tax system would help eliminate the national debt, help our schools, house the homeless, feed the hungry, heal the sick, teach the illiterate, aid the...

## LETTERS TO THE EDITOR

### Speaker wasn't promoted right

I am listed as a speaker at next Thursday's (Feb. 13) "Ethnic Studies Rally." When I agreed to speak — at the invitation of the African-American Student Union — I did so in my capacity as the newly appointed Director of Ethnic Studies.

Little did I know that flyers in advertisement of the event would be prepared and distributed in such a propagandistic and divisive manner.

My hope is that any developing ethnic studies program will be inclusive and that the curriculum will be more pluralistic and multicultural than it will be "diverse."

I thus must say by the way of my own "official" disclaimer, that although I will speak at the rally I am in no way an advocate of separatist and antagonistic attempts to indict "white history," "literature" and "science." Multiculturalism on this campus, as I envision it, seeks to bring us all together, not divide us. I thus disavow myself and my efforts from the loaded and confrontational

stance and message of the posters in question.

Bob Gish  
Director  
Ethnic Studies

### Lose opinion on sports page

Please keep opinionated, biased articles where they belong, on the editorial page! If it's not bad enough that President Baker spent \$10,000 of Cal Poly money to hire a public relations firm to "educate" the student body (to his way of thinking), now you're printing what is clearly biased as real journalism. William Randolph Hearst would have been able to take some pointers from you.

For example, I'm attacking a column by Gregg Mansfield on the sports page that has a cute little logo on a referee that's titled "After Further Review..." with Gregg's name on it.

On February 3, Gregg wrote a piece. Gregg starts off by making some vague allegation that since nobody complains when Pepsi changed its design,

or when David Letterman announces his new top ten list, or when Pete Wilson proposes a 40 percent increase in our tuition, that we shouldn't rock the boat about the athletics fee. Gregg says this is wrong because the majority of students want the increase.

First of all, if truly a majority of students want the athletics fee, it won't hurt to have a re-vote. What are you afraid of, Gregg?

Second, the fee increase is proposed by Wilson, but still has to pass the Assembly and Senate. The athletics increase is here, right now. Students at Cal Poly know they may or may not be able to influence the Legislature in Sacramento that has to consider hundreds of interest groups and issues in voting.

The athletics fee increase is in their own "backyard," and with 3,000 signatures they had better have some influence.

But most significantly, this is presented as journalism when it's obviously an opinion. Gregg is entitled to his opinion, but editor, have some backbone and label it as such.

Haven't the students of Cal Poly been manipulated enough

for one year?

Scott Hayes  
Political Science

### Frats should keep it down

In case you haven't a clue, singing in unison, at the top of your lungs, in a residential area at 1:40 a.m. on a weeknight does not endear you to your neighbors.

There are people in residential areas who appreciate an uninterrupted night's sleep, for example, working folks, infants, school children, the elderly, the ill, and even some college students.

While singing may be fun and good fellowship for you, at that hour it is something quite different for your neighbors. It is disturbing the peace. Try having a little more consideration.

Eric Johnson  
Faculty Member  
Biological Sciences

### Inmate #C20552 wants letters

I am in the California Correctional Institution located in Tehachapi, CA. I am also indigent and without funds to pursue my goals of finding pen pals through normal classified rates. I was arrested March 2, 1987 for multiple armed robberies, convicted and am currently on appeal.

I am desperately seeking new friendships with all person's interested in pen and paper communications. I'm a 31-year-old S/W/M in prison for 47.8 years. Your words will help, photos appreciated (no Polaroids). Write soon!

## HARDBALL

BY  
NEIL PASCALE

### Married to a division of values

Growing up is simply a matter of deciding whose style to emulate.

To swing like Rod Carew. To dribble like Curly Neal. To spit like Reggie Jackson.

Shadowing the moves of the best made you one of them. A winner. A star. At the very least, the block's best spitter.

The guy who couldn't quite make that wetter between the front teeth wasn't necessarily the loser. He just had straight teeth — an acceptable alibi.

The loser was the quitter. The guy whose first attempt landed on his shirt pocket. And who went home crying.

Quitters are notoriously labeled as such, and seldom forgotten for their sin.

Remember Roberto Duran and his "No Mas" fight? Remember anything else about him?

Tom Henderson, the Cal Poly men's track and cross country team head coach, could be labeled as such.

Henderson resigned and will leave the university once track season has run its course.

He cites his decision to leave after seven years because of the move Cal Poly athletics is undergoing.

Division I doesn't appeal to Henderson, who has had a long, happy marriage with Division II.

A division, in Henderson's eyes, that doesn't cheat the academic side of the athletes.

Instead, it makes them something besides yesterday's headline. It enables the student to stand as tall as the athlete, if not taller.

So, Henderson is tying his running shoes on and making a mad dash for the finish line. Running home. With no job in sight or agent at his door offering a bigger contract.

And once again, the quitter is deemed the loser.

Come June 30, Henderson loses what he has done with so much pure excitement and joy for the last seven years.

On that day, the quitter walks away with a nice resume and an armful of memories.

Most coaches would spit at such a suggestion.

To walk because of a belief in a system that is quickly dying on the West Coast. After all, there is no nationwide prominence in Division II. No lucrative contracts. No Dick Vitals.

Just a belief in a system that Henderson seems to think gives academics as much playing time as athletics.

Seems in this case, the loser has come full circle.

Seems the quitter can no longer be called the loser.

A winner, maybe not. But definitely not the loser.

## Mustangs get high marks in debut

Pitching keys one win, Poly rallies in game two for win

By Glenn Policare  
Staff Writer

The Cal Poly Mustangs wrestled the San Francisco State Gators in the opening weekend of baseball season and walked away victorious.

Cal Poly Head Coach Steve McFarland and his Mustangs trotted to the winner's circle twice Saturday in a doubleheader, 4-1 and 9-6.

McFarland liked his team's overall performance.

"We were able to put pressure on the new pitchers," McFarland said. "The team was able to hit and run the bases well."

McFarland said that defense was the key to winning the doubleheader.

"It really helps if you can

HANS HESS/Mustang Daily

Cal Poly won a doubleheader on Saturday in the season opener.

eliminate mistakes," McFarland said.

The Gators took an early 1-0 lead in the first inning, but Mustang outfielder Ben Boulware blasted a two-run homer in the second to give Cal Poly a lead it wouldn't relinquish.

Wild pitches and errant throws by the Gators in the sixth inning allowed outfielder Juan Rojo and first baseman Mike Oakland to stroll home and solidify the Mustangs lead.

Cal Poly's pitcher Mike Matoso went the distance, giving up 11 hits but allowing just one run.

Gator pitcher Zachery Raney gave up six hits and was charged with all four Mustang runs before he was relieved in the bottom of the sixth.

Game two began in the same manner as the first, with the Gators jumping out in front with an early 1-0 lead.

The Mustangs rallied back in

## Close, but no upset for Poly

No. 16 Pomona outrebounds Mustangs in win

By Bryan Bailey  
Staff Writer

The Cal Poly women's basketball team lost the last outing of its six-game homestand Saturday despite playing one of its best league games of the year.

"The only disappointment was the final outcome," said Mustangs Head Coach Jill Orrock.

That outcome was a 75-67 loss to the No. 16-ranked Cal Poly Pomona Broncos.

"I saw some really good things out there," Orrock said. "If we played the same game again tomorrow against Pomona, we'd beat them."

Darlene May, the Broncos' head coach, was also impressed by the Mustangs' performance.

"We bring out the best in everybody," she said. "That was a great game (the Mustangs) played. We feel we beat a very good team."

The Mustangs fell behind 14-2 in the first 4 1/2 minutes of the game and rallied to play the Broncos even until the last few minutes.

The Broncos had an answer for every Mustang threat late

in the game.

Cal Poly pulled to within one point two times in the final four minutes but just couldn't catch the Broncos, who twice managed to rebound and score off their own missed free-throw attempts.

Rebounding played a key role in Saturday's game, with the Mustangs being outrebounded, 39-27.

"We didn't block out, and they got second and third shots at the end, during the last two to five minutes," Orrock said.

The Mustangs led the Broncos by as many as six points at one time during the first half, yet trailed 38-33 at halftime due to a buzzer-beating three-point basket by Cal Poly Pomona's Sylvia Castaneda.

The Broncos managed to overcome several injuries to key players in defeating the Mustangs.

Both junior guard Castaneda and sophomore center Mildred Conston started the game despite knee injuries, and senior forward Leslie Ellis played while running a temperature of about 100 degrees due to a cold, May said.

The victory extends Cal Poly Pomona's winning streak to 13 games. Poly, meanwhile, dropped to 12-10 overall and 3-5 in the California Collegiate Athletic Association play.

The Mustangs came into

Cal Poly's Susanne Carey goes up for a shot in Saturday's game.

## Toros win three-pointer shootout, game

By Geoff Seratti  
Staff Writer

In uncharacteristic fashion, the Mustangs, season-long shooters from outside, lost the three-pointer shootout at Mott Gym Saturday to the Dominguez Hills Toros.

Cal Poly's Shawn Kirkeby's missed three-pointer combined with some pressure free throw shots from the Toros propelled Dominguez Hills to a 68-62 victory.

A crowd of almost 1,000 watched the Mustangs trail by as much as nine late in the second half before pulling to within one at 63-62.

However, the Toros scored the last five points of the contest after Kirkeby's three-pointer attempt from the top of the key skipped off the rim.

"Free throws were big for us at the end," said Dominguez Hills Head Coach Dave Yanai. "It was one of those games where one, two possessions makes a difference."

With the win, the Toros improved to 6-3 in the California Collegiate Athletic Association, good for third place.

Cal Poly Head Coach Steve Beason said the Toros, 14-8 overall, are playing well right now.

"They have a good team, well-coached and good players," Beason said. "Right now they are as good as any team in the conference."

Cal Poly plunged further out of the CCAA

race with the loss as they dropped to 4-5.

The Mustangs, who usually terrorize opponents from outside, made only 6 of 17 three-pointers.

The Toros, meanwhile, shot 50 percent from three-point land, making nine of 18 attempts. Coming into Saturday's game, Dominguez Hills was hitting only 35 percent of its three-pointers for the season.

Oliver said the Toros didn't shoot many three-pointers in the team's first game this season.

"We weren't really expecting it early on," Oliver said. "They were getting double screens and we weren't communicating out there."

Yanai said his team has many players that can hit three-point shots, but it's not part of

See MEN, page 6

## Mustang Roundup

## Poly wins 15 Trip exposes of 19 events Poly's faults

The Cal Poly men's track and field team Saturday completely dominated a three-team field at Occidental College.

The Mustangs, who competed against Occidental and San Diego State, won 15 of the 19 events.

"We have a pretty balanced team this year," said Poly Head Coach Tom Henderson. "We had several holes last year. We don't have those this year."

Among those hole-fillers is Chris Carter, who claimed firsts in the shot put, the hammer throw and the discus.

Poly also took the first four spots in the high hurdles and the first three spots in the pole vault and the triple jump.

The Mustangs swept the first and second places in the 100-, 200- and 800-meter dashes.

The Cal Poly Mustangs men's track and field team's next meet is on Saturday against UC Santa Barbara in Santa Barbara.

One weight class — or lack of — made up a big difference on the Cal Poly wrestling team's Pacific Northwest trip.

The Mustangs lost three of four matches on their three-day northbound trip to Oregon and Northern California.

Two of those defeats, a 22-19 loss to Portland State and 22-17 defeat to Oregon University, were largely due to Cal Poly's forfeits.

Poly also lost to Oregon State, 32-7.

In each of the four contests, Poly forfeited the 142-pound class, giving the opponent six points.

In their only victory, the Mustangs pounded University of the Pacific, 34-13.

"We wrestled really well," said Poly Head Coach Lennis Cowell. "We should have beaten Portland and Oregon."

Individually, Poly's Seth Woodill and Eric Schwartz won three of their four matches on the trip.

## Poly clobbers No. 5-ranked Riverside

By Edwin Bill  
Staff Writer

The Cal Poly men's tennis team showed why it is the defending CCAA champion Saturday

with a hard-fought but convincing victory over visiting UC Riverside.

The Mustangs, ranked No. 3 nationally in Division II, lost only one match on their way to an 8-1 blitz of the No. 5-ranked Highlanders.

Poly's league record improves to 4-1 on the year.

"This is a great win for us," said Head Coach Chris Eppright. "Beating a team of that caliber like we did, we had to play great."

UCR's Head Coach John Houck was humbled by his team's thrashing at the hands of the hosts.

"We always have a tough time here at SLO," he said. "They

have a very solid team. They're the toughest team in the conference, and have been for the past five years."

"It's a nice test for us to come up here early in the season. But we're looking forward to having them come see us."

Senior Max Allman, Cal Poly's top singles player, led the way with a grueling win over Riverside's Steve Aragon, the fifth-ranked player in the nation.

The four-hour contest saw Allman take the first set 7-6 after a wild 12-10 tiebreaker.

Allman served and volleyed his way to leads of 4-1 and 5-2 in the second set, but could not put Aragon away, losing 7-5.

Allman again had leads of 4-1 and 5-2 in the third, but this time held off a late charge by Aragon to put the match away in the final set, 6-4.

Other standout wins for the Mustangs included a straight-set victory for sophomore Mark Ollivier, who aced the Highlanders' Kelly Askvig 6-1, 6-2.

Also winning in straight sets

was junior Steve Arnott, who dropped Riverside's Scott Mounce by the same score.

Continuing the string of victories was Poly freshman Josh Johnston, who rallied for a three-set win.

Sophomore Riccardo Reyes sealed the team victory for the Mustangs using vicious groundstrokes to overtake UCR's Mark Van Ornum, 3-6, 6-3, 7-5.

Adding insult to injury, the Mustangs paired up to sweep the doubles matches.

Allman/Ollivier, Neilsen/Reyes, and Arnott/Montgomery were all victorious.

The Mustangs' only defeat came at the hands of the Highlanders' Brian Giffin, who downed Cal Poly's No. 2 seed, junior Mark Neilson, 6-4, 4-6, 6-4.

Eppright said Saturday's win will be a great tune-up for the showdown this Wednesday against the No. 2-ranked UC Davis Aggies at the Cal Poly courts at 2 p.m.

## WOMEN

From page 5  
Saturday's game off an 83-70 victory over the Cal State Los Angeles Golden Eagles.

The Mustangs had four players in double figures Saturday with junior guard Nicole Lowry leading with 19 points, six of those from behind the three-point line.

Freshman forward Christine Rodness had a good showing off the bench, contributing 12 points.

Junior forwards Beth Nelson and Carrie Schmidt had 11 points each.

Meg Mitchell, the Mustangs' lone senior, was the only player in the game to go the whole 40 minutes, garnering six points and six rebounds in her final appearance at Mott Gym.

"If we played the same game tomorrow, we'd beat them."

Jill Orrock,  
Cal Poly head coach

For the Broncos, junior forward Carrie Stritenberg led all scorers with a game-high 25 points and nine rebounds.

Ellis had 16 points and seven rebounds, Conston had 14 points and nine boards, and Castaneda finished with 10 points.

The Mustangs' next game will be Friday in Riverside against UC Riverside, followed by a game in Orange against Chapman College on Saturday, Feb. 15.

## BASEBALL

From page 5  
the second, scoring twice to take a 2-1 lead.

The Mustangs let down their guard as the Gators scored four runs in the third to take a 5-2 lead.

The bottom of the fifth brought fans to their feet when Oakland doubled to left field driving in two runs, bringing the Mustangs within one.

Poly outfielder Ben Boulware's smash to left field drove in Oakland to tie up the score.

The Gator's scored one more run in the sixth but the Mustangs answered back with four runs to seal the game at 9-6.

Gator Head Coach Mike Simpson attributed the losses to inexperience.

"The team is still young. It may take us 10 or 12 games to put it all together," Simpson said. "We made some baserunning mistakes, and our relief pitching wasn't that good."

Simpson said that his pitching staff missed over the plate instead of off it.

"They took advantage of our pitching mistakes and hit the ball well," Simpson said.

The Mustangs will face Westmont College in Santa Barbara on Tuesday.

STEVEN J. MUELLER/Mustang Daily  
Cal Poly's Shawn Kirkeby tries to block Dominguez Hills' Michael Moore's layup attempt Saturday in the Toros victory.

## MEN

From page 5  
the usual offense. "We just try and work hard for our shots and if those three-pointers become available, then great."

Center Michael Moore led the onslaught with three three-pointers and finished with 20 points and eight rebounds to lead Dominguez Hills.

The Mustangs now need to win the majority of their remaining conference games to be in the postseason conference tournament.

"We need to win four of the next five games to get in, maybe three out of five," Beason said. "Usually a 7-7 record gets in."

Mustangs guard Jeff Oliver said after the loss, "It's going to be hard to get into the conference tournament. We're making it very hard on ourselves."

The Toros were coming off a victory over first-place Bakersfield on Friday night.

Dominguez Hills led most of the game and opened up a 59-51 lead with five minutes left.

The Mustangs stayed in the game behind Kirkeby, who scored 25 points against a smaller Toros team.

Beason was proud of the Mustangs effort.

"That's just the way the game goes sometimes," Beason said. "We had shots. Our players were running the right plays. They just didn't drop tonight."

The Toros also outmuscled the Mustangs on the boards by nine, getting many second- and third-shot opportunities.

Dominguez Hills also excelled from the free-throw line, making 15 of 17, while Cal Poly uncharacteristically shot below 50 percent from the line.

Yanai, in his 15th year as head coach, said his front-line players rebounded well. "We got missed shots and got baskets off of put-backs. We have to claw for every basket we get."

GENERAL MOTORS  
VOLUNTEER SPIRIT AWARD

Cal Poly and General Motors have teamed up to salute students and student groups which have performed outstanding community service. Nominations for this year's awards are underway (Feb. 10 - Mar. 10). The award for groups will recognize activities that took place between Feb. 1991 and March 1992. Individual awards will be given for service performed any time during a student's attendance at Cal Poly. Each award recipient receives awards and GM stock. Faculty members, students and staff are urged to nominate candidates. Application forms can be picked up in U.U. 217. Call Christina Valadez at 541-1762 or Sam Lutrin at ext. 2476 for additional information. The application deadline is March 10.

  
PRESIDENT'S AWARD

## KCPR program studies cases of U.S. 'fascism'

By Christy Crossley  
Staff Writer

Dave Emory, a Bay Area political researcher and radio personality, can be heard on KCPR airwaves dredging the slime of America's intelligence agencies and denouncing international fascism.

Emory began his political research around the time of the Watergate hearings. Suspicious of links between Watergate and President John F. Kennedy's assassination, Emory began extensive research into the Kennedy assassination.

Admitting instances of artistic license, Emory said "JFK," the movie, is an accurate account of the assassination cover-up.

"Many of the media people who have criticized Oliver Stone are themselves people who have helped to cover up the assassination in the media," Emory said during a telephone interview.

Emory said his research specialty is intelligence agencies and international fascism. Because of his area of expertise, Emory is often coined a conspiracy theorist. The term carries negative connotations, he said.

"It's a term I hate. It'd be like someone calling you a 'sweet broad.' It's not a term of endearment," Emory said. Emory, 42, said he usually describes himself as an antifascist.

Emory borrowed one of his work philosophies from Winston Churchill: "Sometimes it's not enough to do one's best; sometimes one has to do what is necessary."

Emory uses radio broadcasts to share his research and to explore topics with listeners.

"It's exciting when I come across something valid and com-

municate it," Emory said. "I'd like to educate people about the reality of the political forces that affect our lives."

Some of the titles of Emory's broadcast programs are, "Uncle Sam and the Swastika" and "George Bush and the Shooting of Ronald Reagan."

During the telephone interview, Emory broke into an impersonation of Columbo questioning then-Vice President Bush about possible involvement in the attempted assassination of President Reagan. Emory's research lends circumstantial evidence to that theory.

"It (research) makes me cynical toward the realities, but I retain hope that the realities can be successfully changed," he said.

Changes are possible if people act, Emory said. "They should educate themselves, call political talk shows and use that as a means of disseminating information, write Congressional leaders, and write to print and broadcast media."

Tuesday, KCPR will air Emory's program, "Your Hit Parade!: Suspicious Deaths, Political Murders and Untimely Disappearances in America," part one.

This program is part of a series called "Hard Rain" that KCPR broadcasts every second and fourth Tuesday from 9 to 11 p.m.

Emory's "The Secret Origins of the Vietnam War," will also air this quarter.

Peter Banchieri, a KCPR staff member, said Emory's broadcasts make listeners think.

"I look at it as an alternative news source," he said. "It's a different outlook that people are exposed to. It may or may not be the gospel truth, but it gets you to question what is the truth."

# Earth Day coordinators plan for April events

By Geoff Seratti  
Staff Writer

It's time to celebrate the earth and the environment because Earth Day is right around the corner.

The San Luis Obispo Earth Day Coalition kicked off the third annual Earth Day season with a meeting Wednesday night. More than 50 people, ranging from Cal Poly students to county planners, came to the San Luis Obispo Veterans Hall to discuss past and future Earth Days.

Coalition member Jim Merkel said the group was formed in 1989 to help prepare for the first San Luis Obispo Earth Day in 1990. The coalition is now organizing plans and events for Earth Day 1992 in April.

Two main events are a fair at El Chorro Regional Park on April 26 and an educational conference on April 25.

Merkel said the fair will have daytime educational activities and demonstrations for all age groups.

He said the fair, which attracted over 2,700 people last year, will have live entertain-

ment and booths with planet-conscious food.

Merkel said the coalition is working to put on an educational conference with nationally known speakers.

He wants to see a day full of workshops covering topics of environmental concerns in the county, such as promoting sustainable agriculture and alternative transportation and reducing pollution.

Almost 500 people worked on 150 events for Earth Day 1990.

Merkel said he expects fewer this year. "We're going to try to focus on fewer events, but have them be larger scale."

He said Earth Day is a time to recognize the environment.

"I think what is most important is for people to live their lives with integrity ... All plants and animals have a voice. We just don't listen well enough."

Cal Poly students have always been a big part of Earth Day, and biology senior Stephanie McGreevey has been heavily involved from the beginning.

She worked on the first Earth Day in 1990. That year she was coordinator of "air day," which

promoted riding buses and bicycles for cleaner air.

McGreevey said she is part of the Cal Poly Earth Day Coalition and the newly formed Environmental Council.

The council, formed in September, is made up of Cal Poly students and run by Student Community Services.

It is funded by ASI to handle campus-related environmental issues. She said the council will put on events for Earth Day 1992.

McGreevey said on Feb. 23, the council, the Cal Poly Earth Day Coalition, the Wildlife Club and Alpha Phi Omega, a service fraternity, will sponsor a beach

cleanup at Morro Strand State Beach, with a free barbecue and entertainment afterwards.

In addition, the Environmental Council will put on an Earth Day fair at Cal Poly this year.

"We actually had a fair on campus last year. We're designing events to educate people," McGreevey said. "I'd like to see more people involved."

National Earth Day is April 22, and Cal Poly's Earth Day is April 23.

McGreevey said for her, Earth Day is a celebration of being alive and living with each other. "The concept of living amongst each other, that you're not on top of the hierarchy and above

anyone is important ... I look at it as an opportunity for people to come together and be open to each other, and they might learn something."

The San Luis Obispo Earth Day Coalition is always looking for volunteers to help out with Earth Day and has meetings on the first and third Wednesdays each month at 7:30 p.m. in the Vets Hall.

The Earth Day Hotline number has more information at 546-3400. The Cal Poly Earth Day Coalition and Environmental Council can be reached at 756-5834 for information regarding the beach cleanup and upcoming Earth Day events.

## Study says crime among blacks rose despite increased education

CHICAGO (AP) — Rising income and educational levels since World War II were accompanied by a drop in crime rates among whites but not among blacks, said a study released Sunday.

The findings challenge "one of the most widely held assumptions of postwar society," namely that liberal social programs can reduce crime by ameliorating social and economic injustices, said the study's author, Gary Lafree of the University of New Mexico in Albuquerque.

Lafree also found that an increase in the number of broken families was not accompanied by a rise in crime among blacks.

"Blacks were making dramatic educational strides in the 1960s and 1970s at exactly the time crime in blacks was rising," Lafree said. Family income among blacks also increased during that period, he said.

"What we're trying to do now is figure out why that is the case," Lafree said at the annual meeting of the American Association for the Advancement of Science.

One explanation might be that rising education and income levels among blacks created expectations for jobs that the economy couldn't meet, he said. The most dramatic rise in education and income among blacks occurred in the period from 1969 to 1973, at precisely the time the economy stalled, Lafree said.

He said his findings were obtained by correlating such things as measures of education and income with the Federal Bureau of Investigation's uniform crime reports.

Lafree said he plans further studies to try to determine whether periods of greater social protest are related to changes in crime rates.

Charles Tittle of Washington State University said Lafree's

study was "provocative and interesting." Tittle is editor of the journal *Criminology*, where Lafree's study will be published in May.

"It's a pretty unusual finding that these variables appear to be different for blacks and whites," he said.

Billy Tidwell, director of research at the National Urban League in Washington, said he was concerned that the study could encourage efforts to abandon social programs.

"There are public officials who would seize such results as justification for the retrenchment from social programs that's been under way since the 1980s," said Tidwell, who had not seen Lafree's study.

"I don't want to dismiss it out of hand," he said, but "it flies in the face of not just conventional wisdom but also what we know empirically about rehabilitation programs for delinquents, like the Job Corps."

## Poll: Clinton, Bush lead races

LOS ANGELES (AP) — Arkansas Gov. Bill Clinton holds a slim lead in the New Hampshire Democratic primary race, but three-fifths of the likely voters surveyed said they may change their mind, a Times Poll showed Sunday.

Clinton leads former Massachusetts Sen. Paul Tsongas 33

percent to 28 percent as the pivotal Feb. 18 primary draws near, the poll found.

Nebraska Sen. Bob Kerrey was supported by 9 percent of the likely voters, Iowa Sen. Tom Harkin had 8 percent and former California Gov. Jerry Brown had 7 percent. Eleven percent were undecided and 4 percent sup-

ported another candidate.

But only 41 percent of likely Democratic voters said they are "certain" to vote for the candidate they now support. Fifty-eight percent said they still "might change."

One-third of the Clinton supporters called Tsongas their second choice, and likewise, a third of the Tsongas supporters called Clinton their second choice.

In the Republican contest, President Bush holds a 61 percent to 30 percent lead over conservative commentator Patrick Buchanan. Seventy-one percent of Bush supporters said they are "certain" to vote for Bush compared to 65 percent of those backing Buchanan.

The Times Poll surveyed 2,133 registered New Hampshire voters from last Monday through Friday, including 672 Democrats and independents who said they intend to vote in the Democratic primary and 710 registered Republicans and independents who said they intend to vote in the Republican primary.

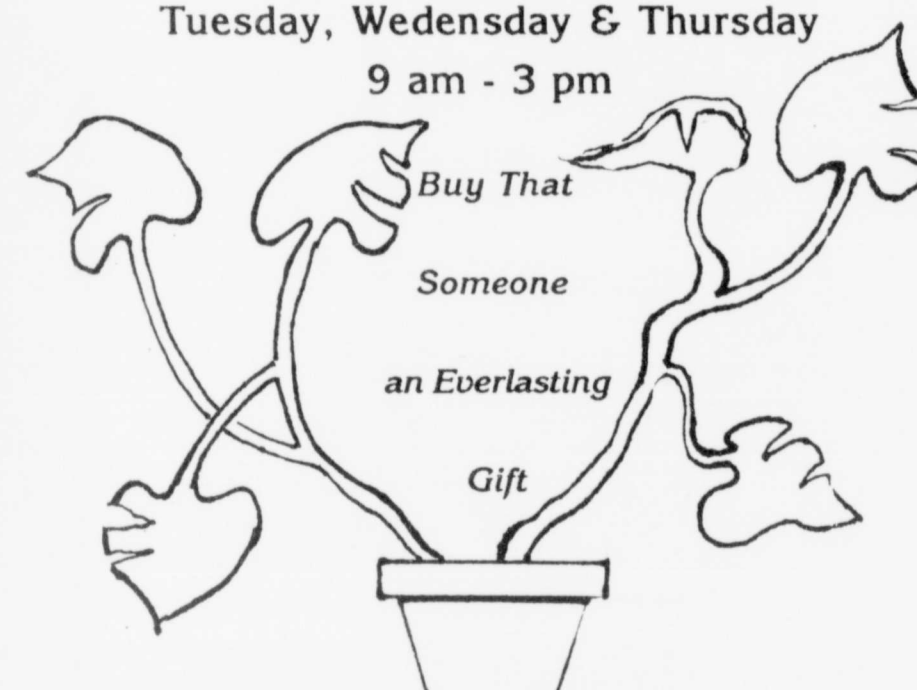

The margin of error was four percentage points, meaning Clinton's lead in the Democratic race is within the poll's margin of error.

# Local doctors react to breast implant scare

By Renee Gallegos  
Staff Writer

The Food and Drug Administration has asked for a voluntary, temporary halt on the sale of silicone gel breast implants, but many physicians and at least one local surgeon believe the move is unfounded.

A few weeks ago, the FDA requested a stall while it reviews new information about the con-

troversial product's safety.

The FDA's advisory committee, consisting of outside experts, will reconvene in late February to make a decision on the future of silicone gel implants.

According to the Los Angeles Times, the temporary ban is a result of two recent, private suits against Dow Corning Wright, the leading manufacturer of the device.

Silicone implants have been

notorious for safety hazards in the past. Women have had complications such as the implant's leaking or rupturing, as well as problems of interference with mammography readings.

Another major concern is the possibility that the device may aid in the frequency of arthritis, lupus or other connective tissue disorders.

While consumer advocates were looking for a mandatory

ban of the product, most plastic surgeons found the request to be unnecessary.

Locally, at least one physician has similar feelings. "I don't think it (FDA) has enough information to have cause to request the ban," said Dr. Marshall Jelderks, a San Luis Obispo plastic surgeon. "I think they (silicone implants) are very safe."

"There are only a small percentage of people who are aller-

gic to aspirin, but we don't take it off the market," he said.

Although Jelderks finds the temporary ban unjust, he is complying with the FDA's decision. "We have been advised not to perform the procedure due to malpractice reasons," he said.

Over the last 30 years, more than 2 million women have received silicone implants.

# Tulare show reveals latest in ag technology

By Rick Shandley  
Staff Writer

The cutting edge of the agriculture industry will be on display at the 25th California Farm Equipment Show in Tulare. On Feb. 11-13 the largest assembly of farm equipment and agriculture technology in North America is being presented to the public.

That's the view of Mark Watte, this year's chairman and 1974 Cal Poly graduate in farm management. The show is sold out this year, even with 64,000 square feet of additional exhibit space added to the 80-acre showground, Watte said

Thursday.

Watte said this show is a springboard for the 1,050 exhibitors who have from one to 100 pieces of equipment each on display.

"If any tractor dealer has anything new, they'll introduce it at this show," Watte said.

The show is one good way to keep Cal Poly students abreast of what is happening in the agriculture industry, said agricultural engineering professor Mark Zohns. There is a concerted effort to get as many faculty and students as possible to go to the Tulare Farm Show, Zohns said. It is a commitment to get over to Tulare and back in one day — it

means canceling all classes for a day, he said.

"I have the Tulare Farm Show built right into my class schedule so there is no lab time for those three days," Zohns said.

Other teachers permit students to make up classwork or make other arrangements.

"It's more than an equipment show. It's an agriculture showcase," Zohns said. There is one tent devoted exclusively to companies with computer hardware and software dedicated to agricultural applications. There

are the traditional manufacturers of farm equipment, then there are many companies introducing new equipment and

prototypes. A new building for state-of-the-art dairy equipment is ready this year, Zohns said.

Cal Poly has its own tent to show off the School of Agriculture. Inside the tent will be poster displays showing recent student and departmental research, Zohns said. A synchronized audio/video slide show will feature the school of agriculture and its activities.

"We promote the students going to the farm show to get them to see just how big and diverse agriculture is," Zohns said. "We want people to know we're excited about agriculture at Cal Poly," he said.

At the show, Zohns said, stu-

dents see technology they didn't realize was in the field of agriculture. The show gives students a chance to see what is out there.

"It's a menu of opportunities they didn't realize existed," he said.

## WELLNESS

From page 2

*In the middle of some heavy kissing and foreplay, one partner says, "do you have a condom?"*

*The other partner answers "no, but you don't have to worry."*

*The woman says, "well, I'd kind of like you to wear one." The man collapses face first on the bed and moans, "I don't have one. Come on, relax, I'll pull out and it's not like I have AIDS or anything, trust me."*

*"Oh, OK, but next time maybe we should use a condom." And, once again, a couple engages in unprotected intercourse.*

What could this couple have done to enhance their communication and therefore prevent this scenario? Here are some suggestions:

- Discuss contraception before you enter the bedroom, not in the heat of the moment.

- Decide, beforehand, how far you want to go — know your limits.

- Plan what you want to say to your partner and role play with a close friend.

- Pick a time and place to talk, and be flexible if it can't happen at the time you planned.

- Be patient, just because you're ready to talk doesn't mean your partner is. He or she may need some time to think.

Hopefully, these hints will be helpful in breaking the ice and promoting open communication between partners.

Fortunately, sexuality and communication are becoming more socially acceptable. Today, more men are agreeing to use condoms, and more women are buying condoms, openly discussing sexual issues and enforcing that their partners wear a condom.

Safer sex has also appeared in the movies more often in the last few years, such as in *Pretty Woman*, *Naked Gun* and *Frankie and Johnny*. In all of these films, contraception was mentioned. That's an encouraging step in the right direction.

Hopefully, we will continue to see an increase in communication. Don't hesitate to come to the Health Center and talk to us. Our team is very open-minded and comfortable discussing sexual issues.

*The sexuality educators will be in the U.U. for Love Carefully Week. Staci Graham is a sexuality peer health educator.*

## You've Just Been Cleared For Take Off.

You can get a lot more out of life when you set your sights a little higher. Which is what applying for the American Express® Card is all about. When you get the Card, it's easier to do the things you want to do. And with the student savings that come along with it, you can do even more.

Fly roundtrip on Continental for less than \$100 each way.

Student Cardmembers receive four travel certificates. They can be used to fly anywhere Continental Airlines flies in the 48 contiguous United States. Two for the school year, and two for the summer.\*

Depending on where you fly, each school year travel certificate is good for \$129 or \$189 roundtrip—and each summer travel certificate is good for \$149 or \$199 roundtrip.

Savings that upgrade your lifestyle.

As a student Cardmember you get more than great travel savings. You also save money on everything from clothing to long distance phone calls. All for a \$55 annual fee.

Obviously, savings like these say a lot about the value of the Card. And having

the Card will say a lot about you. For one thing it says you have a handle on what you spend, so you don't have to carry over a balance. It also says you're smart enough not to pay interest charges that can really add up.

So take a few minutes now to call (have your bank address and account number ready), and apply for the American Express Card.

With all that the Card offers you, not even the sky is the limit.

THE CARD.  
THE AMERICAN EXPRESS® CARD.

Airfare examples based on destination.	
Roundtrips	Your School Year Fare
New York-Los Angeles	\$189
Boston-Orlando	\$129
San Francisco-Denver	\$129

Get going, call 1-800-967-AMEX.

If you're already a Cardmember, there's no need to call.  
\*School year is considered Sept. 1-June 14, summer June 15-Aug. 31. Complete terms and conditions of this travel offer will arrive with your certificates.  
Continental Airlines alone is responsible for fulfillment of this offer. American Express assumes no liability for Continental Airlines' performance.

# Poly, UC Davis join for cheese-making class

By Julia Greenberg  
Staff Writer

California cheesemakers and Cal Poly students will have a chance to become "cultured" on campus next month.

A short course on cheese manufacturing will be offered March 17-19 by Cal Poly and UC Davis as part of the activities of the California Dairy Foods Research Center.

The course is designed to teach the basic scientific information and practical skills needed to understand and manufacture cheese.

Topics covered will include basics such as dairy chemistry and microbiology, coagulants, sensory evaluation of cheese, and plant sanitation.

"This is the first year we've done this," said Phillip Tong, director of Cal Poly's Dairy

Products Technology Center.

"The course is targeted at people from the cheese industry who want to upgrade their knowledge of recent developments," he said.

"The California cheese industry has grown so quickly in the last 15 years," Tong said. "There's a real need to keep manufacturers and supervisors aware of the latest technology available."

Experts from academia and industry will serve as the course instructors. Classroom lectures and actual cheese-making experience in the dairy processing plant will take place.

"This is a good opportunity for me to learn more about dairy equipment and systems," said Mike Huyg, a dairy science senior. "It's also a good opportunity for me to meet representatives from the industry and learn

about future employment."

Enrollment will be limited to the first 25 registrants.

The \$295 registration fee includes a comprehensive course syllabus, refreshment breaks, a wine and cheese reception, lunch for all three days of the course and a three-day campus parking permit.

For more information, call Leslie Cooper at 756-6101 or Dee Nielson at 756-1586.
